

Carpentry Tool List

This is Carver Center's Carpentry Tool List. Every carpentry student is expected to provide and maintain their personal carpentry tools throughout their four years at Carver Center. Tools do not need to be purchased new. They can be second hand, used, from a relative, or a thrift store. If a student is uncertain about or has difficulty finding any tool it is fine to wait until the new school year begins for the tool list review. It is preferred that carpentry students have most tools on day one of the new school year.
